In current circumstances, it becomes increasingly necessary to reach an economic-environmental balance nationally, regionally (European) and worldwide.

Achieving the economic-environmental balance at the macro level, involves the initiation of projects and programs to rehabilitate the environment or conservation, actions subject of financial restrictions.

They sent messages to participants: Rector Professor Radu Ion, Assistant professor Ph.D. Cristina Nicolaescu, engineer Ph.D. candidate Luminita Jurj - the

Environment Agency Arad, Gabriela Cristescu - Aurel Vlaicu University professor Ph.D. presented Mathematical approaches in economic and environmental efficiency and Silviu Szentesi - Aurel Vlaicu University professor Ph.D presented the results of the research Project Ideas 1239/2007.

The large topic of the symposium occasioned the presentation of scientifically elaborate papers, with practical aspects of the multiple participants work.

Among the symposium guests were Şoneriu Adriana from AJOFMS, Gheorghe Dragan - President ACT FM Radio, Bianca Bolojan - Director of Cristiana Nurse Institute.

The whole activity was a success, being a real exchange of ideas; the proposed models can be applied by local environmental agencies, being useful tools in the foundation of social decisions, financial and even at government level.
