Annex 57

Rector’s Statement Regarding the Policy in the Quality Field

The “Aurel Vlaicu” University from Arad is a high education institution which develops activities in education, scientific research and social insertion in high performance conditions.

The “Aurel Vlaicu” University from Arad, through its high educational and research offer, gives attention to the identification and meeting of the needs and expectations of local, regional and national society so that the academic activity should contribute to the long lasting development of the country.

The “Aurel Vlaicu” University from Arad carries on a consolidating and developing policy of its international position, making its activities compatible with advanced academic standards and practices, existing in European Union countries and in other high developed standard states.

The “Aurel Vlaicu” University managing staff expresses its wish to support the changing processes by generating new pieces of knowledge that meet the society needs and integration in the European area, assuring the necessary human resources and direct involvement in the development and efficient running of the Quality Management System in the university.

The quality and efficiency of the services offered to home customers (students) and outer ones (economic and social environment) represent the background of the “Aurel Vlaicu” University success. As consequence, due to the care and responsibility of each university employee, beginning with its managing team, one speaks about quality of education and the connected ones processes, all contributing to the quality of professional training and education.

The success of the university policy, in the quality field, lies in assuming the responsibility for the contribution brought to meeting the institution targets by all the community members beginning with those that assure the top management.

The strong point of the university policy in the quality field is the concern for a continuous improvement of the organization and carrying out the
activities, in a modern way, with several feed backs, priority being offered to the main elements: education, scientific research and social insertion.

As Rector of the “Aurel Vlaicu” University from Arad, we will act for the successful implementation and keeping of a Quality Management System, for achieving a high performance education, for a continuous improvement of the quality level of services and processes developed by the university.

Because of this:

- Quality is the central axis of the university management
- We promote creativity and entrepreneurial activities as key factors of quality improvement
- We assure discipline and rigor and make everybody be responsible for achieving the mission
- We have a permanent dialogue with students, economic environment, society and employees for achieving new forms of communication and a climate that favors their involvement in the reaching the quality targets
- We plan and evaluate systematically the processes developed in the university in order to improve performances and use efficiently the resources
- We update the educational curricula as a consequence of the analyses of customers’ needs and their fulfillment and put into practice the scientific research results for assuring the customers’ contentment in accordance with the requests of the market working force
- We assure a working climate in the university, based on responsibility and mutual respect so that each participant to the process may put into practice his/her professional and intellectual capacity
- We assure the increasing of the educational process performances through a high level scientific research, in accordance with the needs and expectations of present day science and technique by the teaching staff’s and students’ involvement
- We act to integrate the educational process in the European educational area
- We use the high tech as a background for a continuous improvement of the quality of the educational and research activities, on all organization levels by all the involved factors.

Rector
Univ. Prof. Ph.D. Ramona Lile
